EDUCATION

University: Quaid-e-Awam University of Engineering, Science & Technology, Nawabshah
Degree: Bachelor of Engineering in Software Engineering
Expected Graduation Date: Spet, 2025
CGPA : 3.19

SKILLS

- **Programming Languages:** Python, C++ JavaScript
- **Web Development:** React.js, Node.js, Tailwind CSS, Express.js, Bootstrap
- **Database Management**: MS SQL Server, MySQL,
- **Tools & Platforms:** Git, Docker, Azure, Linux
- **Other:** Problem-solving, teamwork, adaptability

LANGUAGES

- English: Basic
- Urdu: Fluent

PROFILE SUMMARY

Software Engineering student with hands-on experience in web application development and database management. Proficient in modern programming languages and frameworks, with a strong foundation in solving real-world problems through academic and collaborative projects. Seeking a role to apply and further develop technical skills.

PROJECT

Final Year Project (FYP)

Title: OBE V2.0 - Student-Centric LMS (In Progress)

Description: Developing an enhanced web-based Outcome-Based Education (OBE) system to streamline academic performance tracking, feedback collection, and reporting.

Key Features:

- **Reporting Component:** Designing GPA, CGPA, and CLO/PLO-based performance reports.
- **CQI Component:** Building tools to identify students not meeting CLOs and enabling targeted assessments.
- **Survey Component:** Implementing surveys to collect and analyze feedback from students and instructors for continuous improvement.

Technologies Used: React.js, Node.js, MS SQL Server, Microsoft Azure.

Role: Contributing to system architecture, frontend design, backend logic, and database integration.
